Submitting Country, Organization, Company: Open Apparel Registry

If Organization or Company, please indicate the approximate number of employees: 5

Title of the action: Open Apparel Registry: Creating an open source map and database of global apparel facilities, their affiliations and unique OAR IDs assigned to each facility

Upload an image: ![Open Apparel Registry Logo]

Relevant Website: [https://openapparel.org/](https://openapparel.org/)

Partners: Azavea (technical partner), Laudes Foundation (lead funder), Humanity United (project funder), GIZ (project funder)

Type of initiative: Civil society initiative
Description of action

• The Open Apparel Registry (OAR) exists to:
  - Create one common registry of apparel facility names and addresses and an industry standard facility ID
  - Eliminate issues with matching across multiple, inconsistent databases
  - Enable in-facility collaboration between organisations

• With over 57,000 facilities (as of May 2021) and growing, the OAR is the world's largest open database of apparel facilities, contributed to and used by stakeholders across the apparel industry.
• As brands and other organisations continue to publish their supplier data, the OAR team will work to increase adoption of the OAR as a publishing tool (either by the brand / organisation uploading themselves, the OAR team uploading public lists on behalf of organisations, or through direct API integrations with brands/organisations hosting supplier databases).
• By publishing directly to the OAR, apparel facility data will be accessible and usable, which is not always the case when individual organizations publish locked PDFs, images, or spreadsheets on their own websites.
• The unique OAR IDs allocated to each facility in the database not only eliminate confusion, but enable interoperability between siloed datasets, with further data exchange facilitated by the OAR's API.

Research and Development of Innovative Solutions
Collaborative initiatives

Scope of the action, including a description of the value chain processes that are covered

Objective
Map the world's apparel facilities on an open, accessible map & database and allocate a unique ID to each.

Commitments
The Open Apparel Registry is currently funded to continue to grow and operate through 2025, with the goal of mapping 200,000 facilities (a raw estimate of the number of apparel facilities worldwide), with 85-90% of the world's apparel facilities having an OAR ID by the year 2023.

Value chain scope
All tiers of apparel facilities, excluding the raw material level.

Timeframe and/or milestones for the action

• March 2019: Launch
• December 2020: 50,000 Facilities Mapped
• 2023: 200,000 Facilities Mapped

### Expected benefits and impact for the stakeholders involved

<table>
<thead>
<tr>
<th>Benefits/Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enhanced visibility of compliance with sustainability requirements by industry actors/partners along the entire value chain</td>
</tr>
<tr>
<td>Enhanced environmental and socially responsible consumption and production, and circularity of the value chain, that may be relevant to and inspire other countries and industry actors/partners</td>
</tr>
</tbody>
</table>

### Stakeholders involved

- Business and industry associations
- Intergovernmental organizations
- Non-governmental organizations (NGOs)
- Scientific and technological community
- Workers and trade unions

### Key performance indicators for the action

- Number of facilities in the OAR
- What is the average number of affiliations (or connections) for each facility?

### Good practices

- ZDHC integrates with the OAR
- Higg integrates with the OAR
- OAR Case Studies
- SBS Dateline Episode: How COVID19 disrupted fast fashion’s supply chain (OAR appears at 14 minute mark)

### How has this UNECE-UN/CEFACT Call to Action contributed to strategic engagement and/or public awareness in support of your commitment?

Visibility to increase adoption of the OAR and OAR ID. OAR ID listed as a Recommended Identifier.
