

UNECE-SDA Bocconi Regional Workshop 21-23 September 2021

Business Requirements – Data Model – Messages for traceability and transparency

22 SEPT, 2021, 16.00 – 17.30 CEST

Gerhard Heemskerk,
UNECE Project Expert

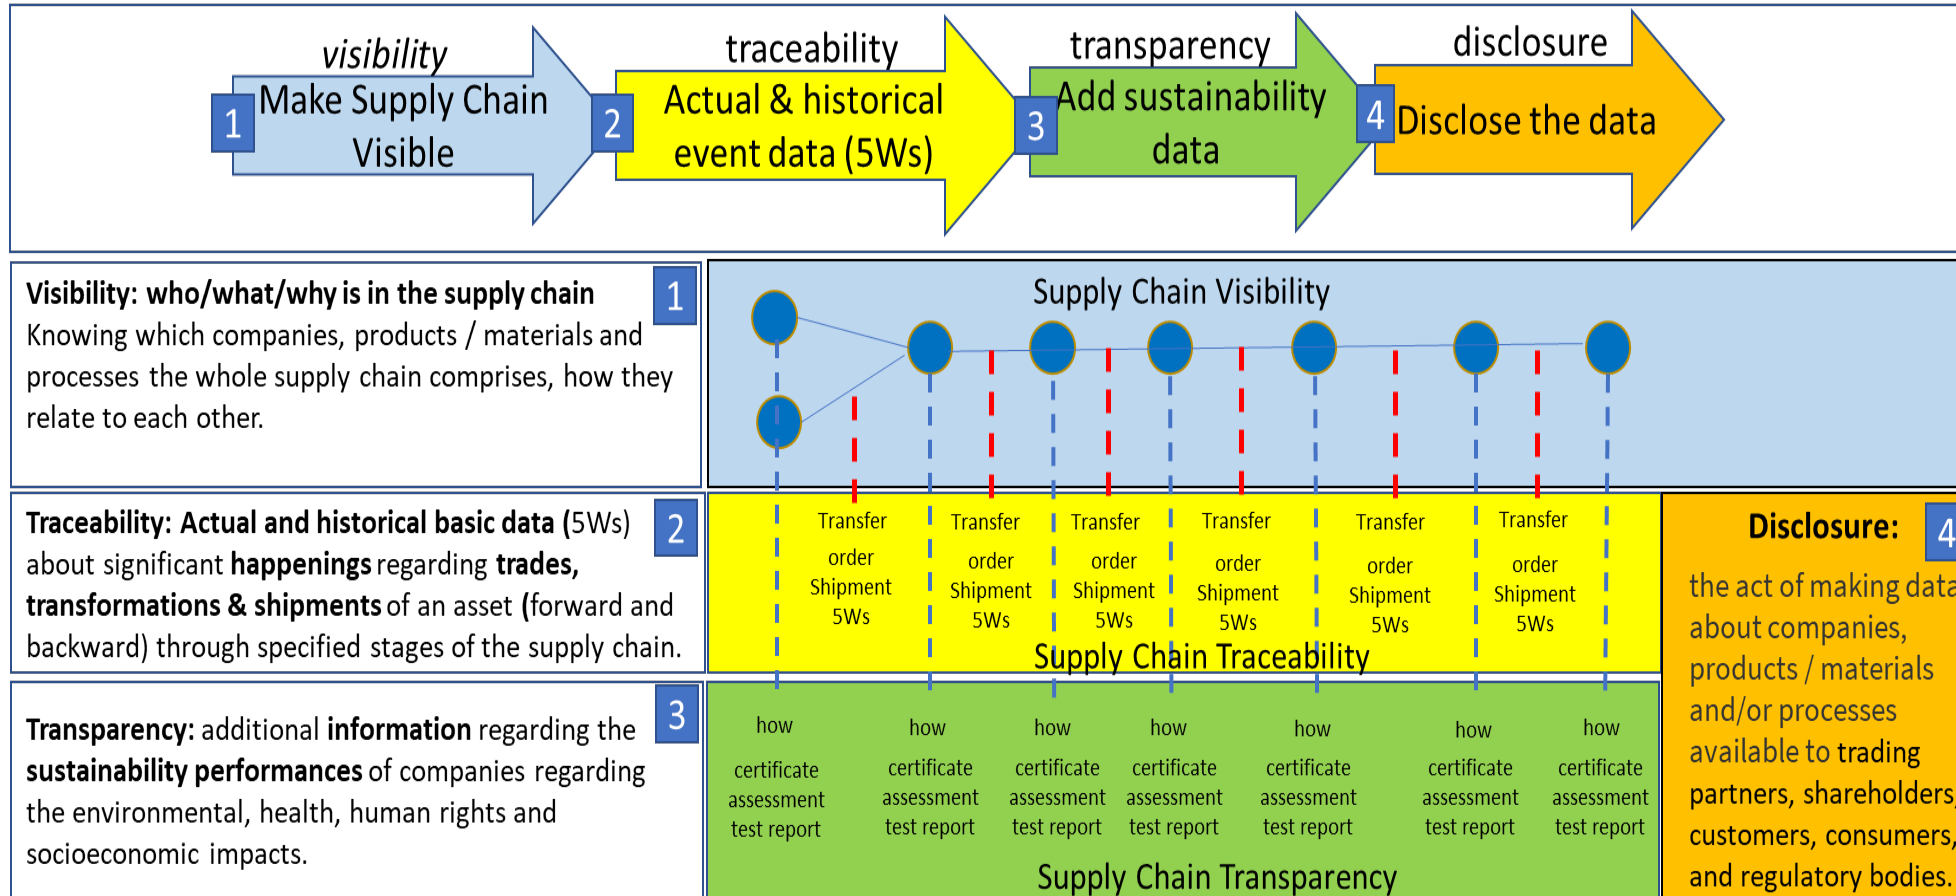

Claudia Di Bernardino,
UNECE Project Expert

Concepts behind the standard for information exchange

Claudia Di Bernardino

UNECE

THE
SUSTAINABILITY
PLEDGE
TRACK IT, TRACE IT, WEAR IT!

United for greater traceability, transparency and circularity in the garment and footwear sector

What is the difference between supply chain visibility and disclosure?

VISIBILITY

Knowing which companies, products / materials and processes the whole supply chain comprises, how they relate to each other

DISCLOSURE

Making available data of companies, products / materials and/or processes to trading partners, shareholders, customers, consumers, and regulatory bodies

Transparency is about accountability, compliance to sustainability plus the disclosure of information to trading partners, shareholders, customers, consumers, and regulatory bodies

Traceability and transparency information

TRACEABILITY INFORMATION

basic data - 5Ws

Why, Who, What, Where, When

Information on the movement of an asset forward and backward through specified stages of the extended supply chain

TRANSPARENCY INFORMATION

additional (sustainability) data

How

Information on sustainability performance of companies, products/materials and/or processes

Evidences of traceability & transparency information

EVENT INFORMATION

Where (Location)

What (Material/Product)

Who (Facility/Company)

Why (Business Step/Process)

When (Date/Time)

DOCUMENTS RELATED TO TRANSACTIONS

Shipping Note

Commercial Invoice

Delivery Note

Packing List

Transportation Document

DOCUMENTS RELATED TO SUSTAINABILITY CLAIMS

Certificates

Audit/Inspection Reports

Laboratory Test Results Reports

NGO/Civil Society Attestations

Declarations

Traceability Evidences

Transparency Evidences

Define what to disclose and to whom

WHO

WILL HAVE ACCESS TO YOUR
INFORMATION?

WHAT

TRACEABILITY AND TRANSPARENCY
INFORMATION ARE YOU WILLING
TO SHARE?

Poll 1: What level of detail do you require for transparency? *(either from a business/government/consumer perspective)*

- a) Only the type of certificates and assessments reports
- b) A digital copy of certificates and assessment reports
- c) Sustainability performances, meaning all KPI's (easy processable measurements)
- d) All of above grouped by product, product batch, process, production facility, party, location, transportation.

Agenda

Gerhard Heemskerk

- **Business Requirement Specification**
- **Data model and messages**
- **Code Lists and Identifiers**

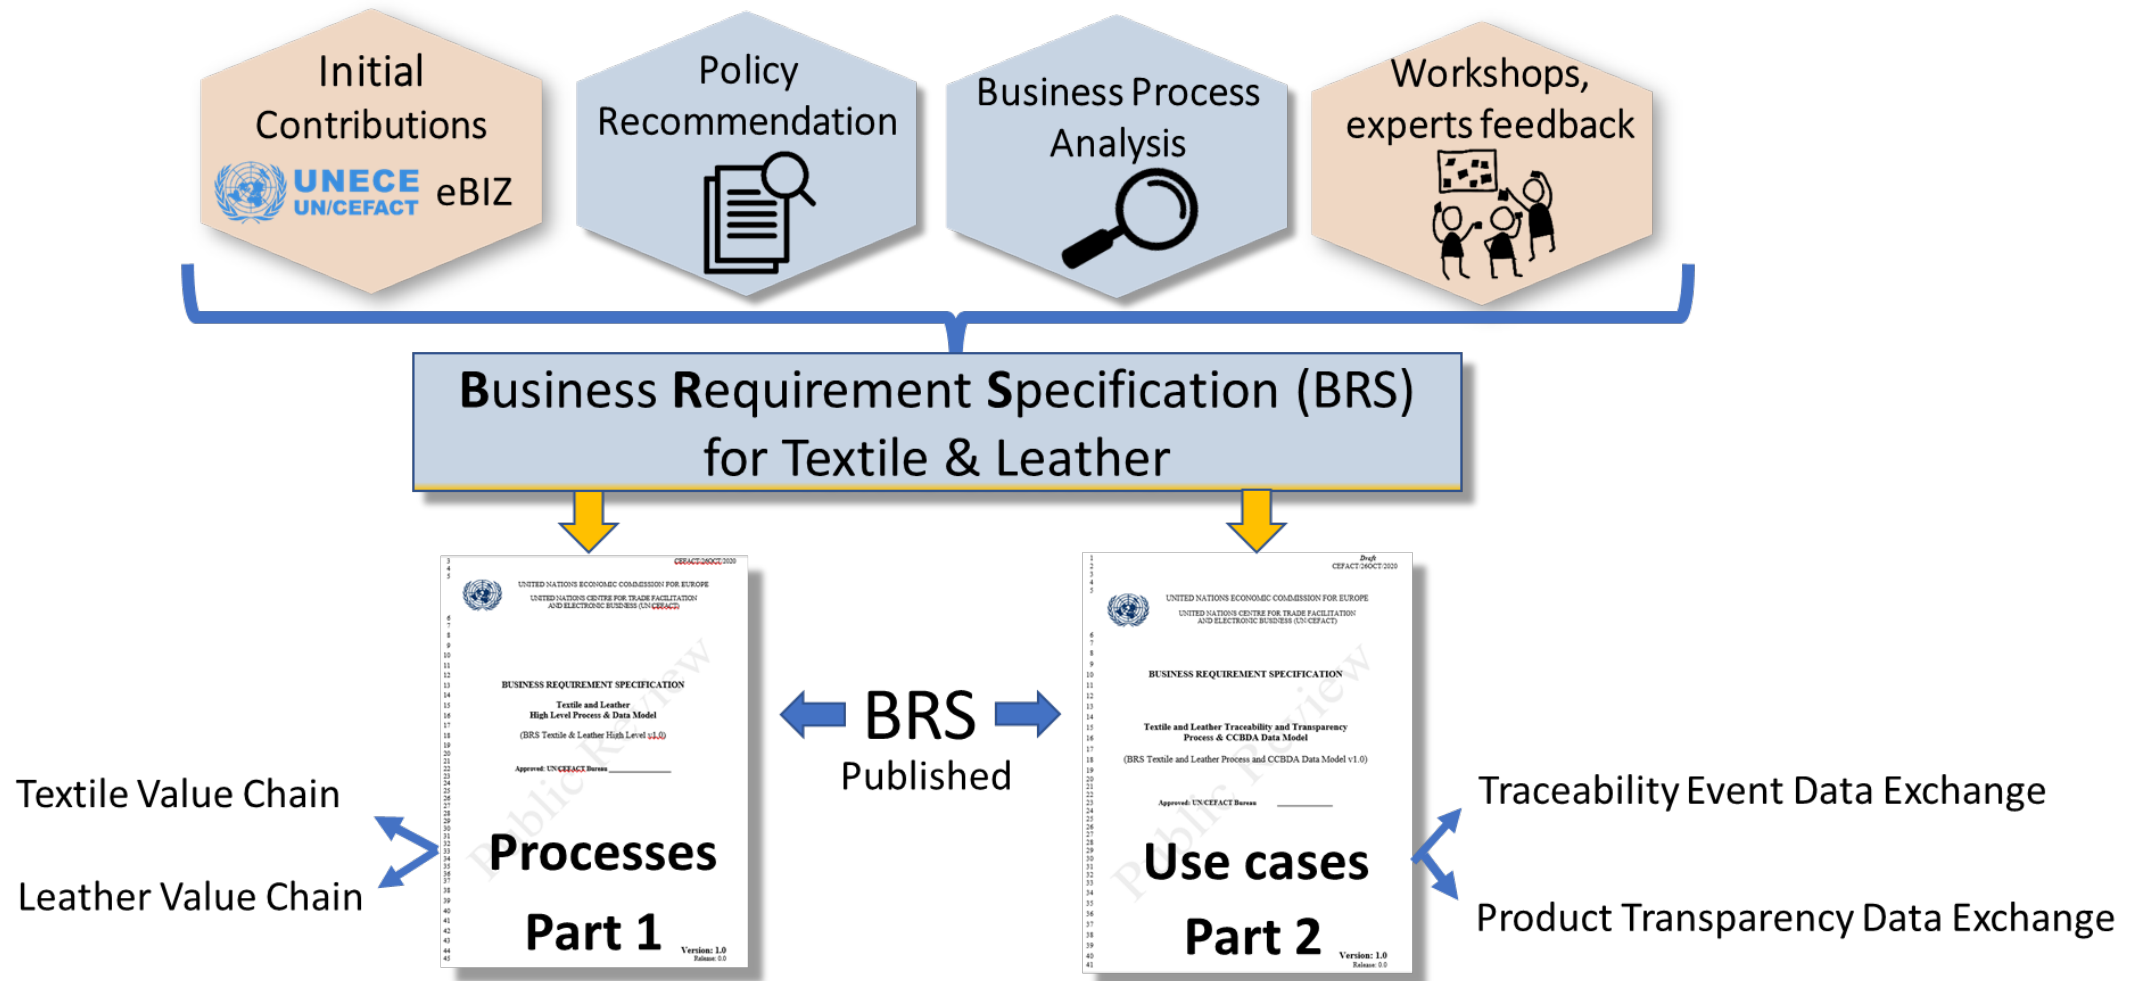

UNECE

THE
SUSTAINABILITY
PLEDGE
TRACK IT, TRACE IT, WEAR IT!

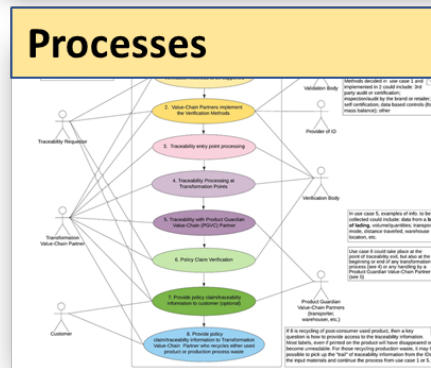

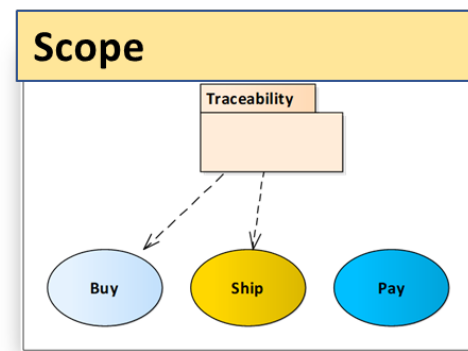

United for greater traceability, transparency and
circularity in the garment and footwear sector

Business Requirement Specification

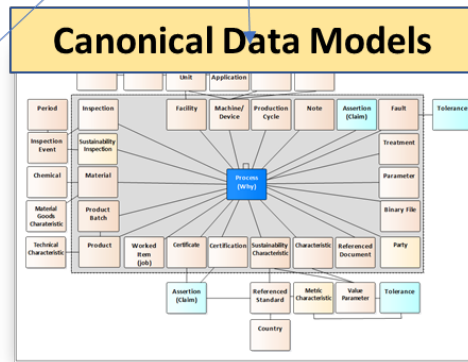

Business Requirement Specification (content)

Functional Requirements		
2	Brand Owner	A person or company who sells any commodity under a registered brand label.
3	Consumer	A person who purchases goods and services for personal use.
4	Customer	A person or company who buys goods or services from another company.
5	Dye/Bleach, Wash provider	A person or company whose trade is the dyeing, bleaching or washing of cloth or other material.
6	Effluent Treatment Party	An individual, group, or body having a role in effluent treatment, meaning cleaning industrial effluents, contaminated water from rivers and lakes, and so on in order to reuse the water for additional purposes. Along such lines, water is reutilized and sustained.
7	Farmer	A person or company engaged in agriculture business, field crop growing, cattle rearing for the meat or others productions (hides, milk, egg, wool, etc), breeders, raisers, finishers etc.
8	Ginner	A person or company who operates a cotton gin machine which separates the seeds and hulls from the cotton fibre.
9	Inspector / certifier	A person or company who inspects something, such as a product, process, organization, to ensure that it complies to requirements or regulations.
10	Laboratory Party	An individual, group, or body having a role in laboratory observations.
11	Manufacturer	A person or company which makes finished products from raw materials or intermediary products in order to make a profit.
12	Recycler	A person or company who recycles, or uses machines to recycle.
13	Retailer	A person or company that sells goods to the public in relatively small quantities for use or consumption rather than for resale.
14	Slaughter	A person or company (slaughterhouse) who slaughters animals, most often to provide food for humans, but also for the skins (hides).

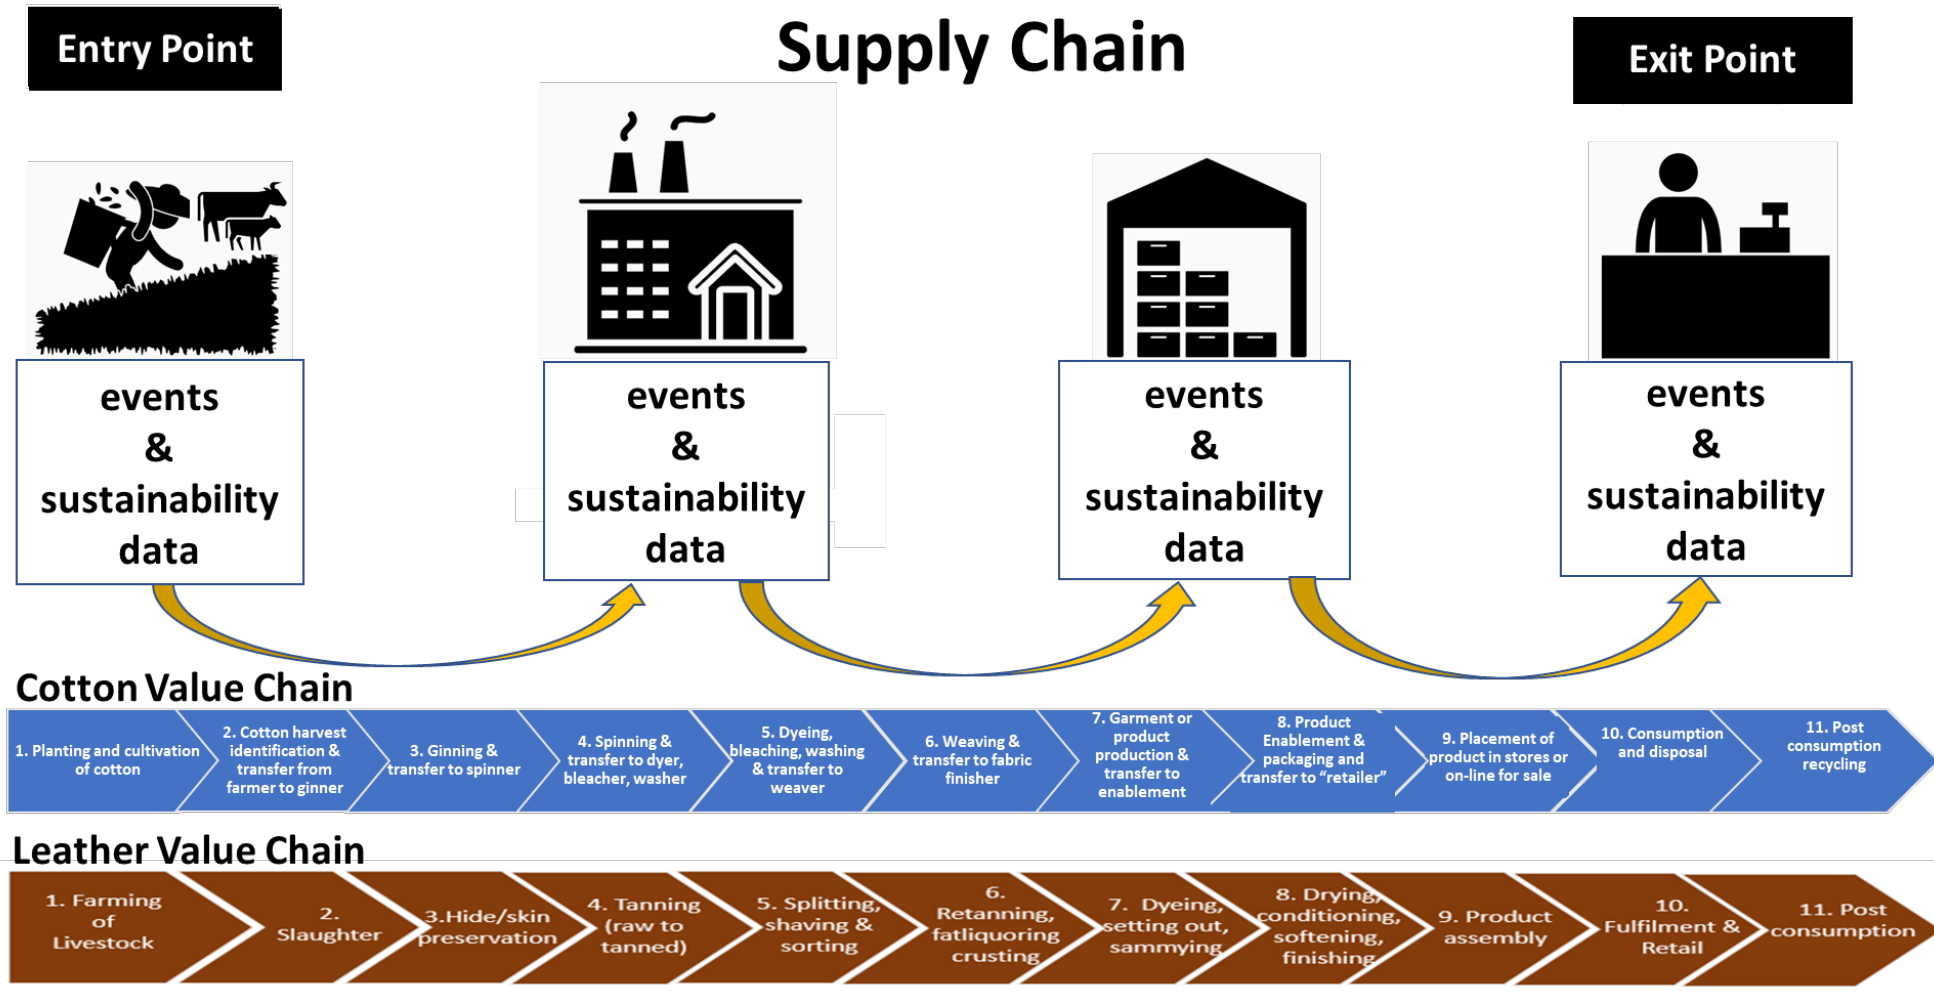

Definitions	
agent trader	organisation buys and sells material at different stages of production and may conduct a small operation on the material that does not chemically alter it
aniline leather	<material> leather whose natural grain is clearly visible either without a surface coating or with a non-pigmented surface coating
basicification	NB: The thickness of non-pigmented surface coating is usually less than or equal to 0.01 mm <process> mild alkali treatment to ensure completion of tanning e.g. treating the mineral tanned stock with a view to forming a large aggregate of metallic compounds and enabling reactive groups of skins to complex with tanning material
bate	enzymatic enzymes mixed with an inert carrier used to selectively remove unwanted constituents of hides and skins
Acid bate	bate that has optimum activity in the pH range of 3 to 5
alkaline bate	bate that has optimum activity in the pH range of 8 to 10
bating	the process of removing unwanted interfibillary proteins by treating the hides and skins with bates to obtain soft and pliable leather with a smooth grain surface
beam	equipment-convex wooden slab sloping downward from about waist height over which a hide is placed for unhairing, trimming off excess flesh and ragged edges and scudding by hand knife
brand agent	organisation buys and sells finished leather on behalf of brands without any transformation of material

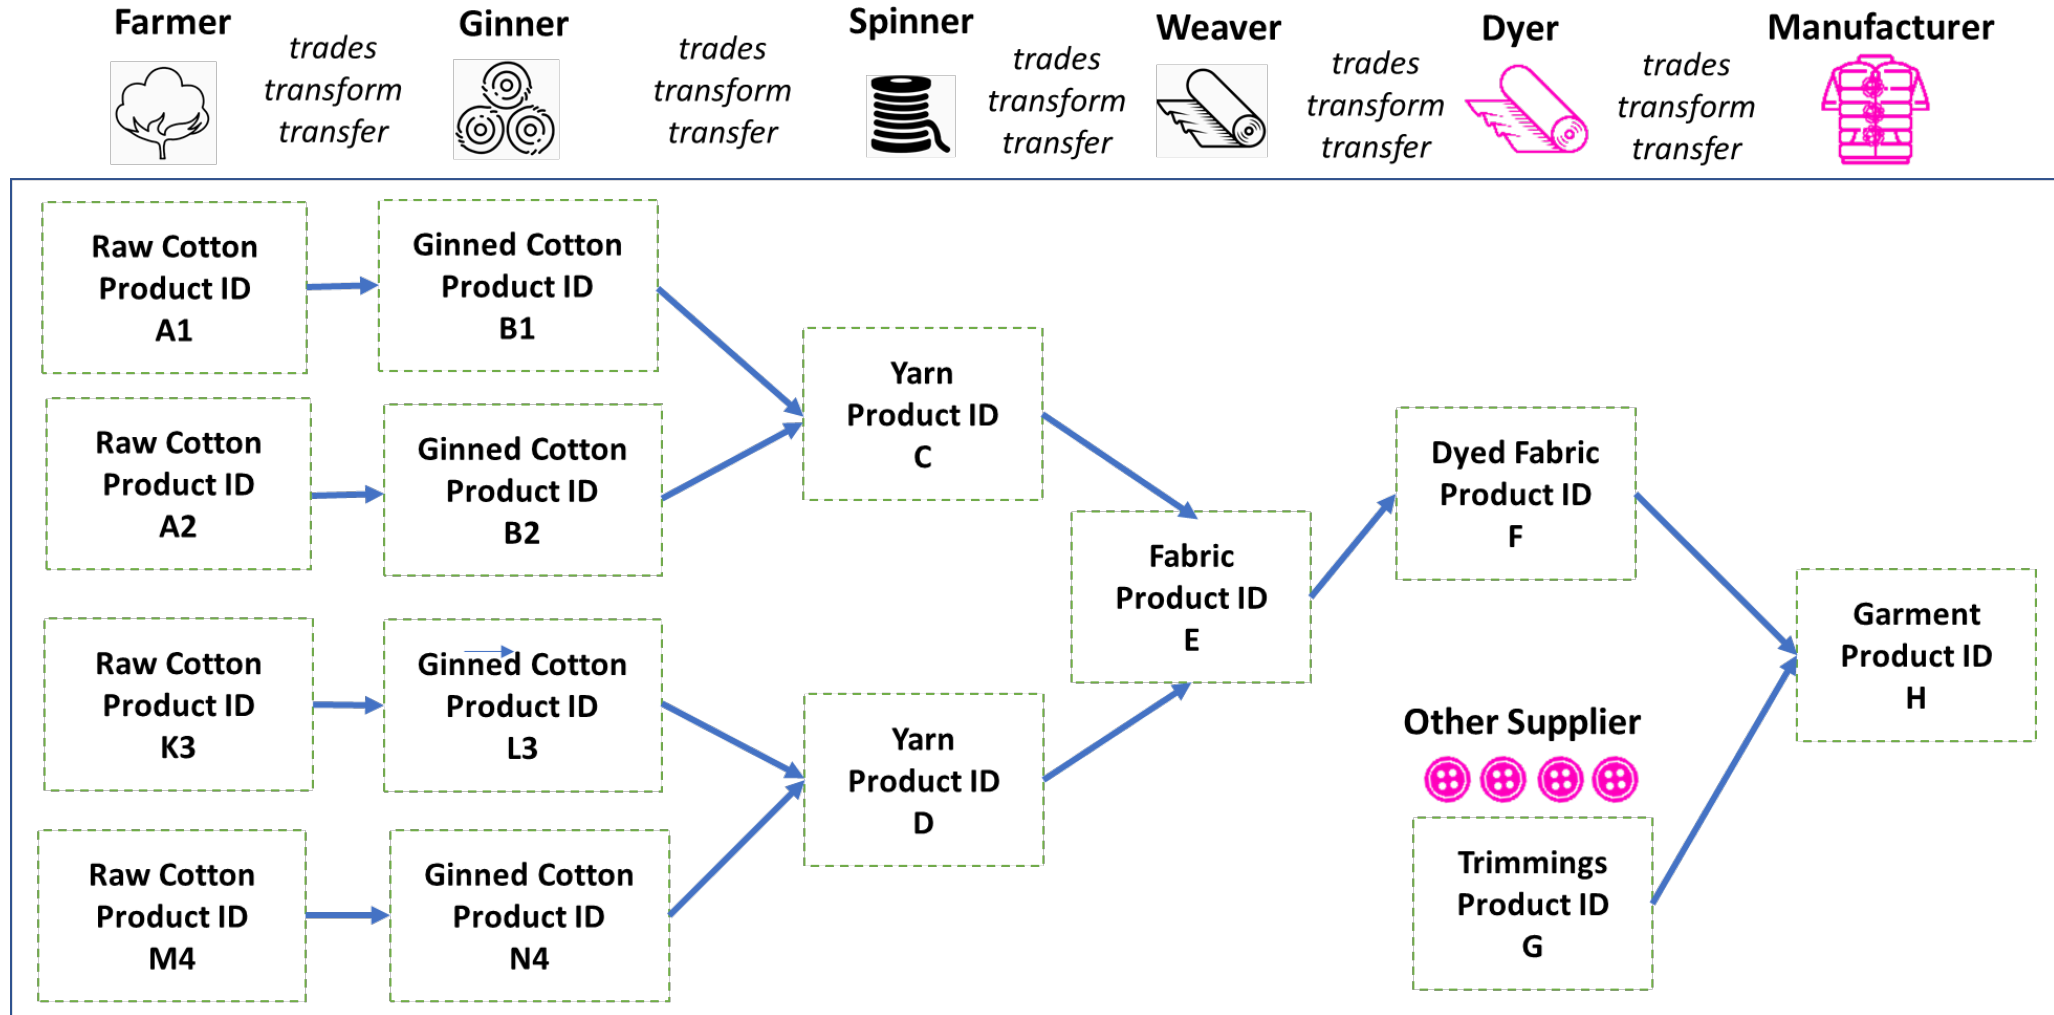

Data Requirements

Entity	Organization Characteristic	A prominent attribute or aspect of an organization.		
Attr.	ID	A unique identifier for this organization characteristic.	0	unbounded
Attr.	Type Code	The code specifying the type of organization characteristic.	0	1
Attr.	Description	A textual description of this organization characteristic.	0	unbounded
Attr.	Value Measure	A measure of a value for this organization characteristic.	0	unbounded
Attr.	Value Number	The value, expressed as a number, for this organization characteristic.	0	1
Attr.	Measurement Method Code	The code specifying the measurement method for this organization characteristic.	0	1
Attr.	Condition	A condition, expressed as text, for this organization characteristic.	0	1
Attr.	Value	A value, expressed as text, for this organization characteristic.	0	unbounded
Attr.	Value Code	The code specifying the value of this organization characteristic.	0	1
Attr.	Value Date Time	The value for this organization characteristic expressed as a date, time, date time, or other date time value.	0	1

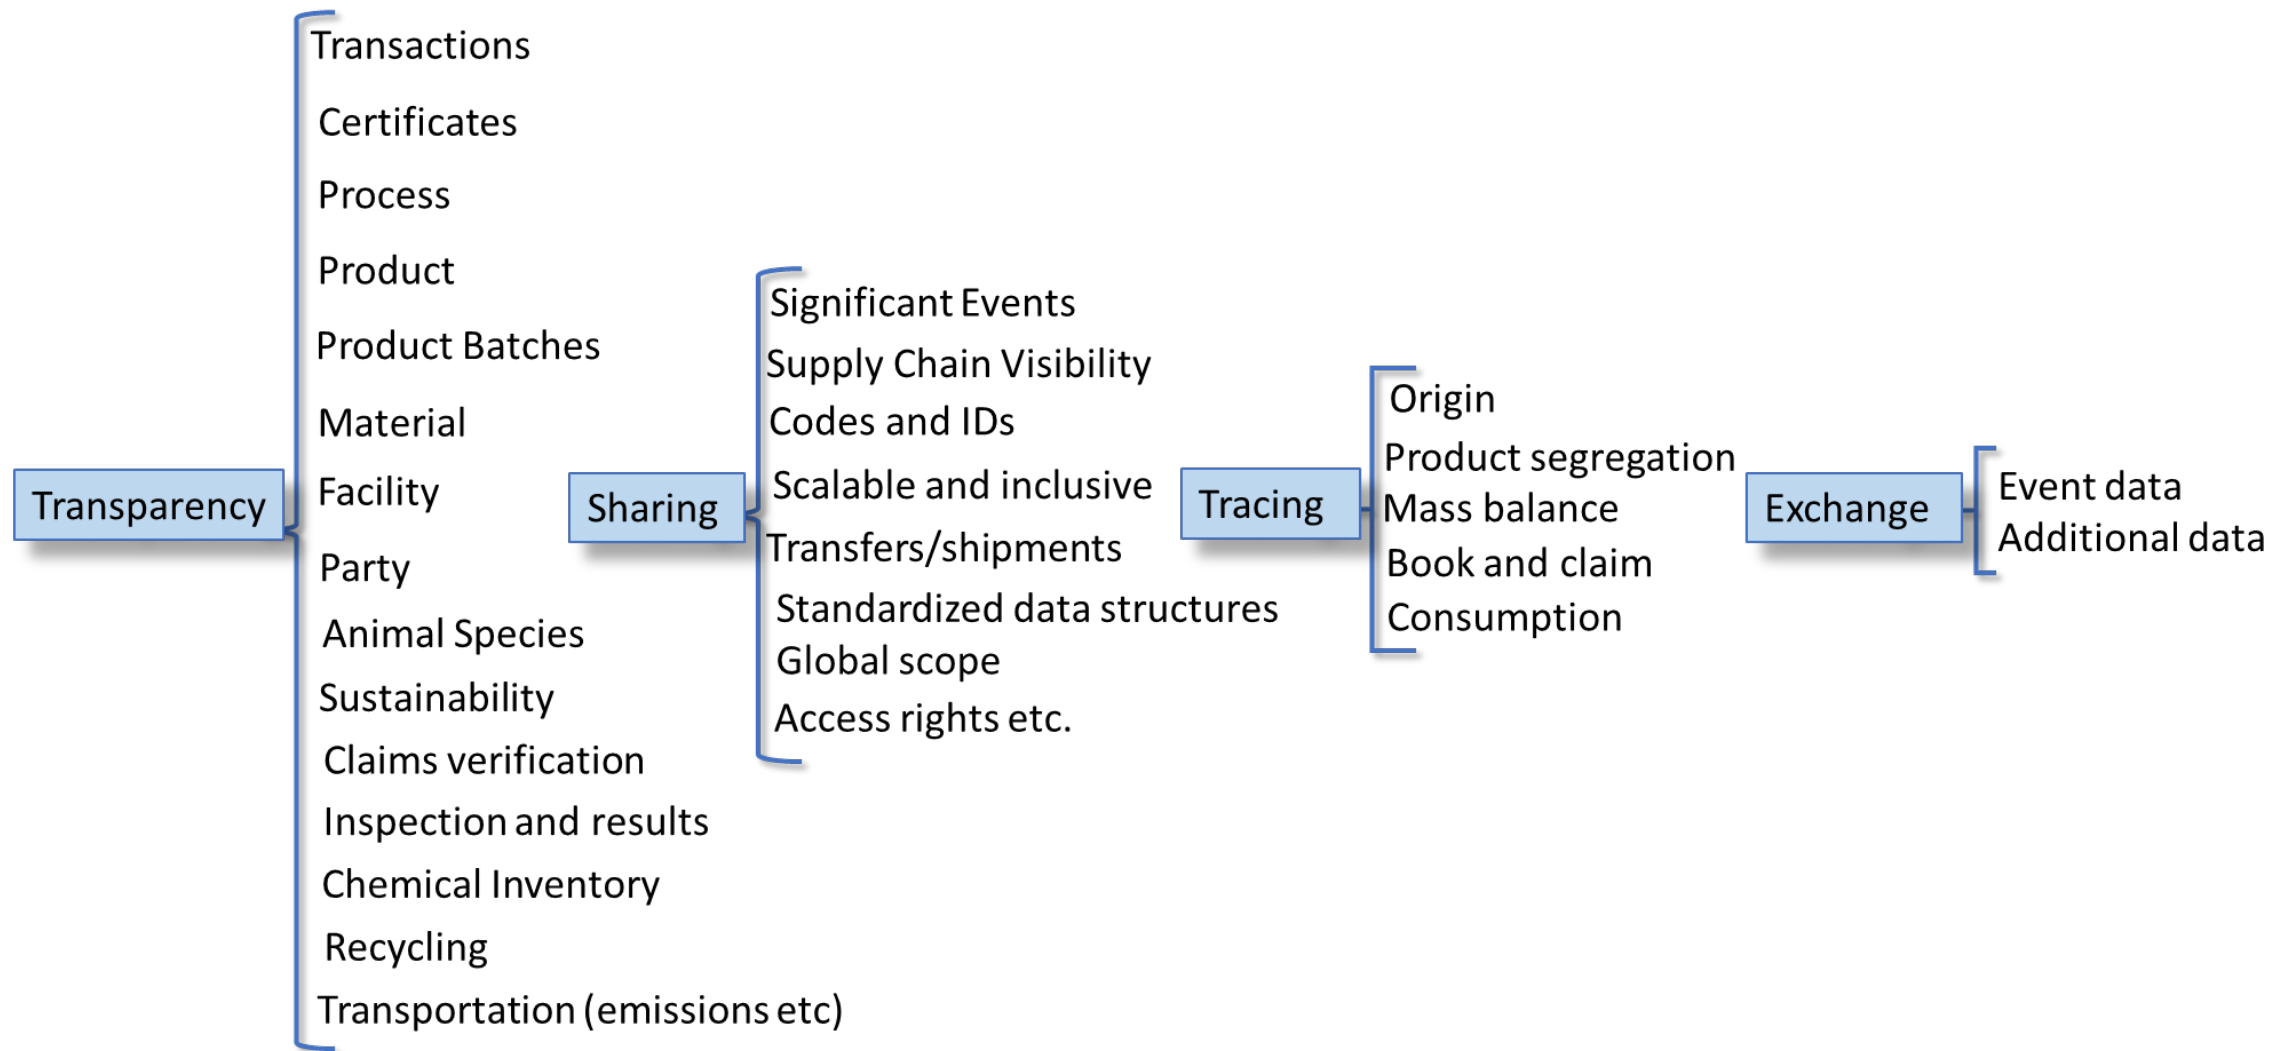

Need for Supply Chain visibility

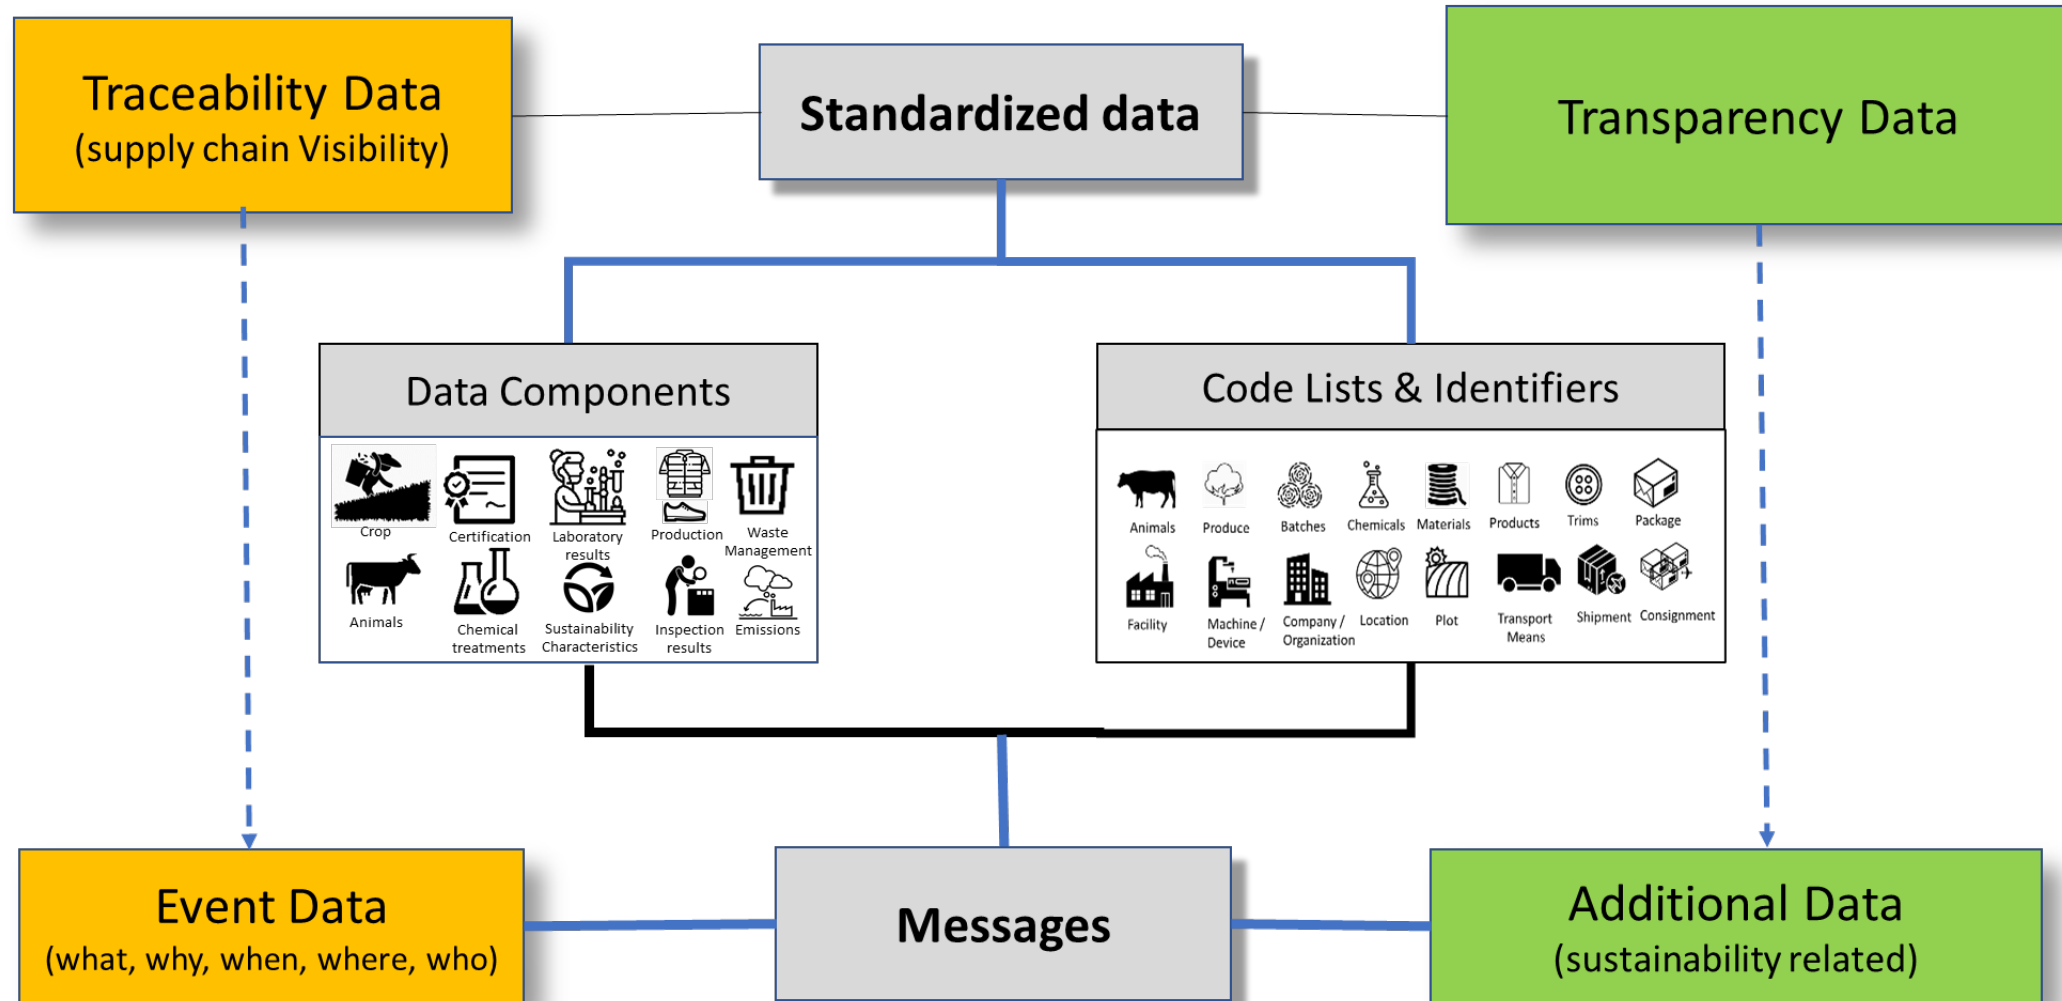

Need for linking all together, building a trace

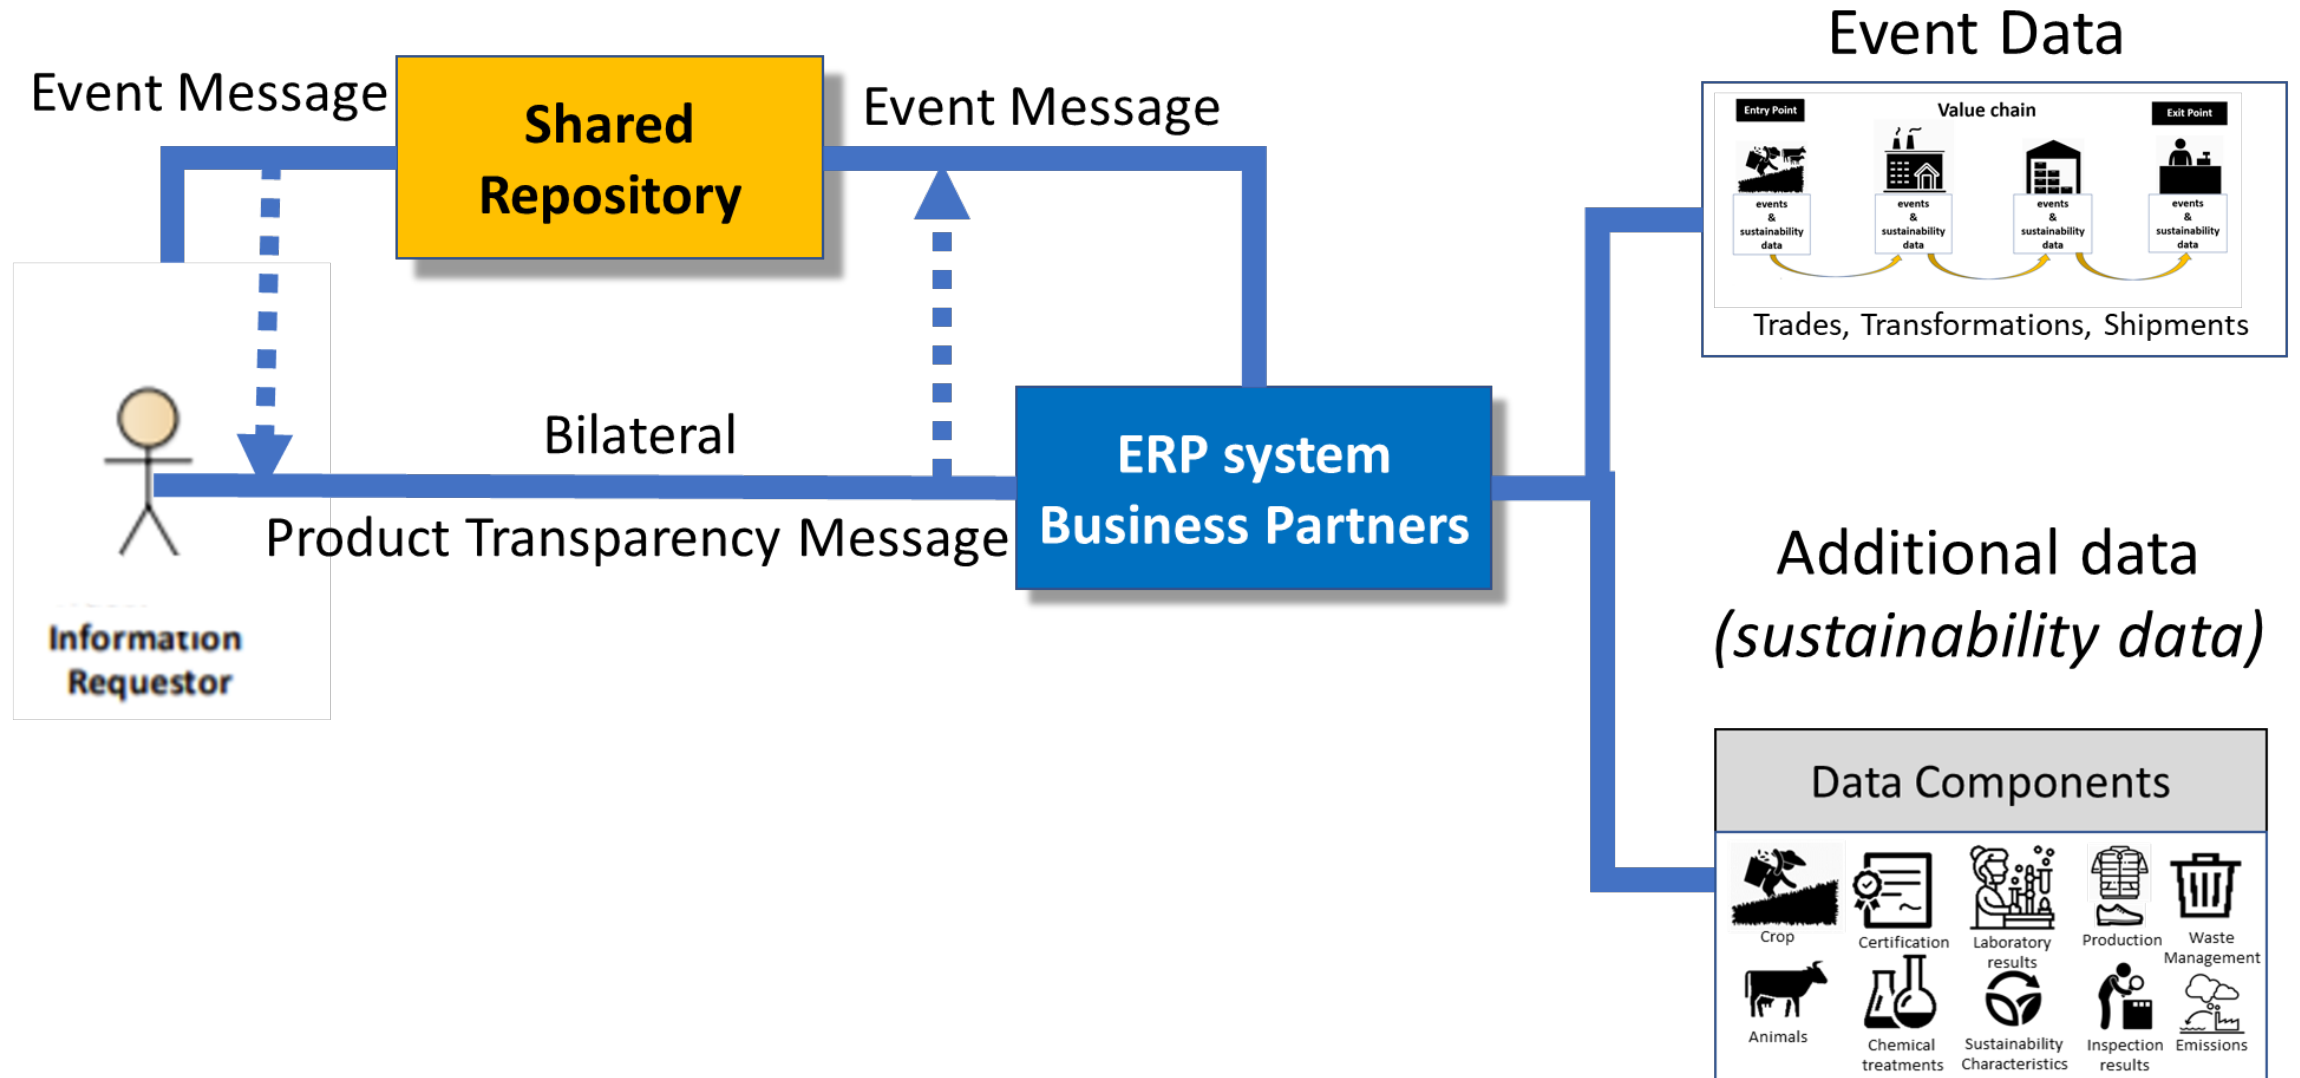

Need for transparency through tracing and sharing data

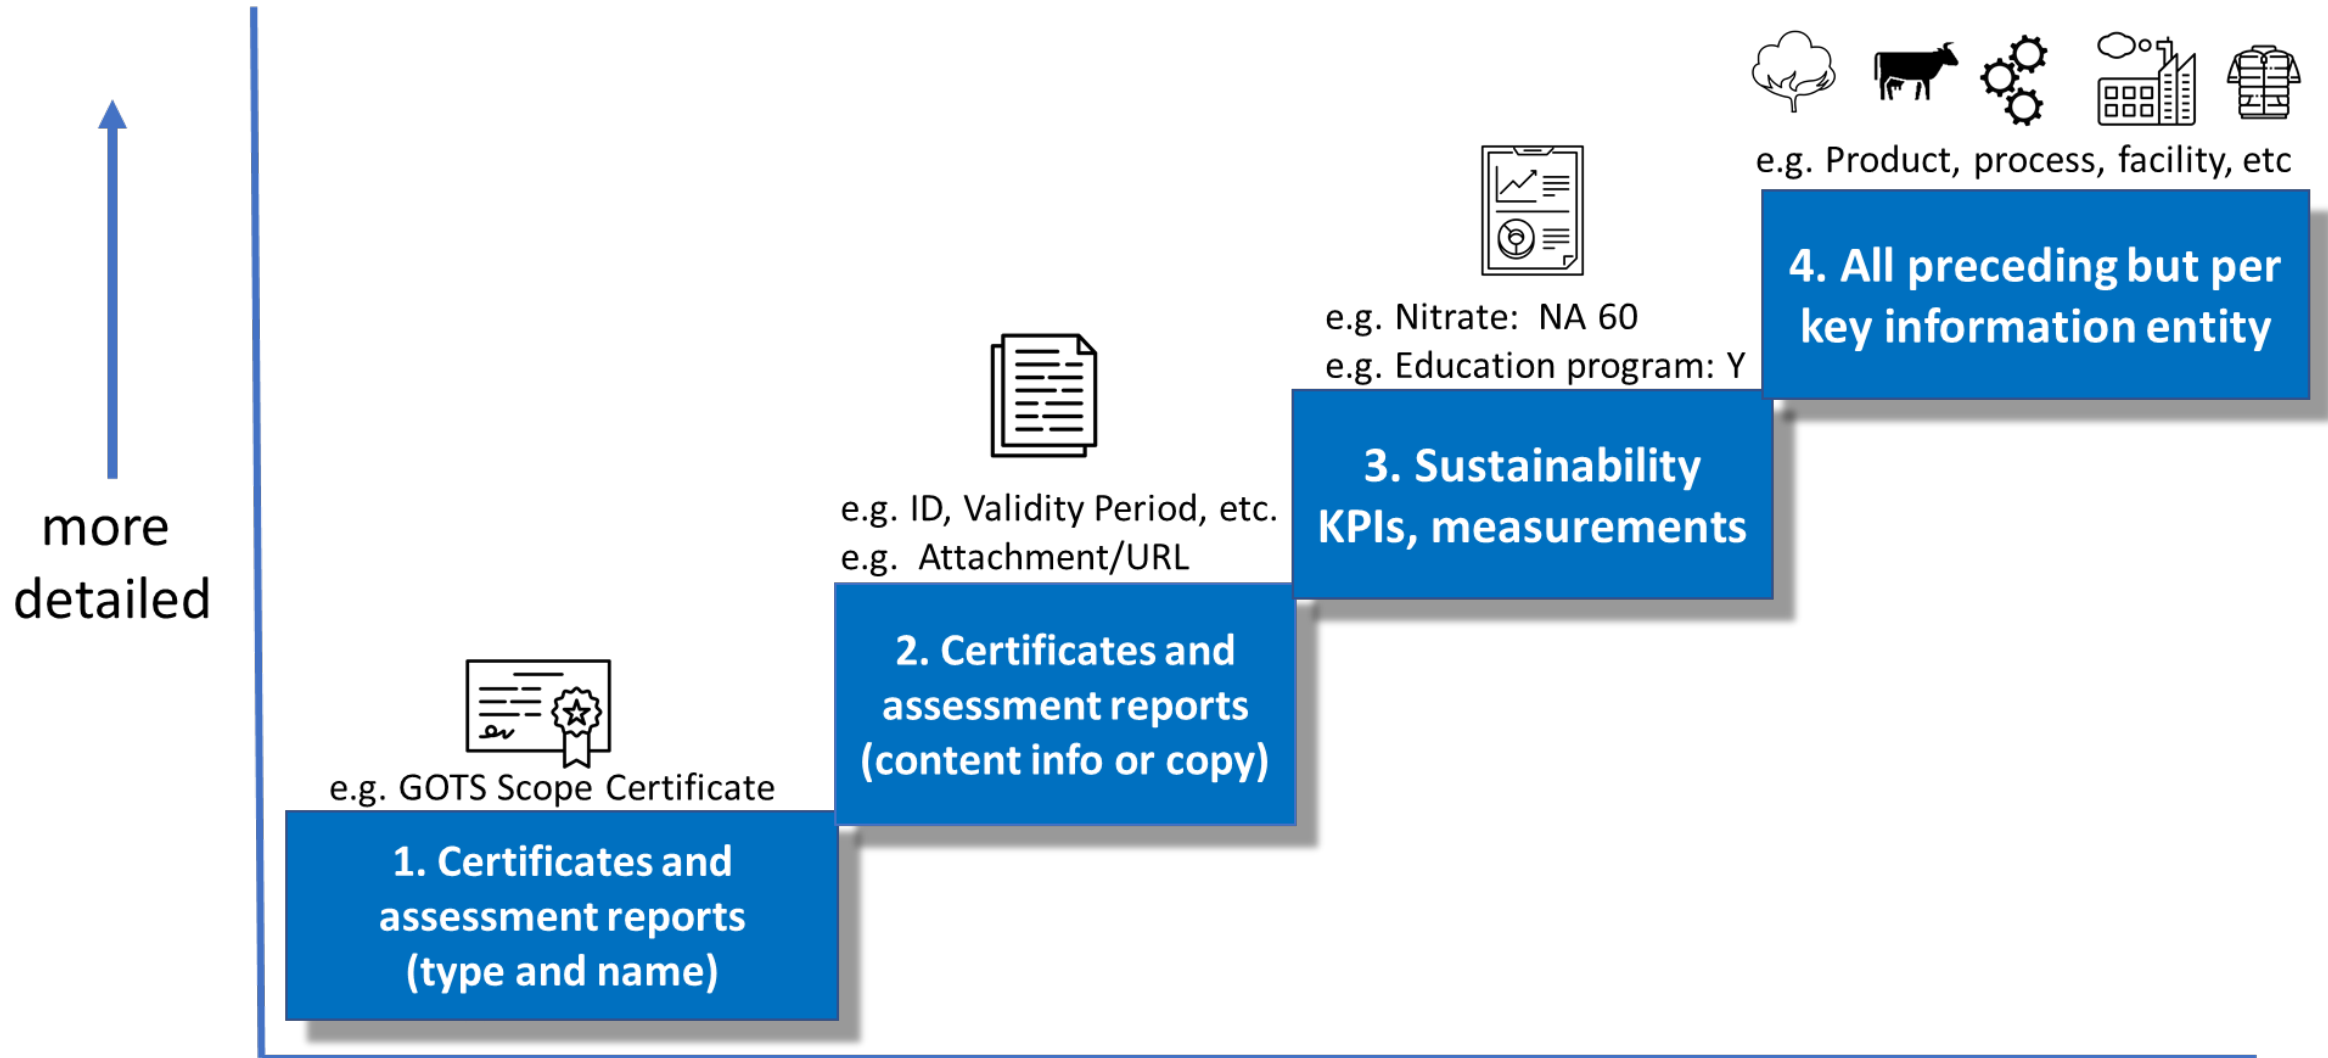

Need for exchanging standardized data

Need for sharing data

Need for extending transparency data

Need for evidence documents supporting a claim

Some

Textile and leather data model: specific information exchange requirements

Claudia di Bernadino

Poll 2: What kind of specific information exchange will be required sooner or later? *(either from a business/government/consumer perspective)*

- a. Certificate and/or assessments reports
- b. Inspection reports
- c. Chemical compliance reports
- d. Waste disposal and recovery reports
- e. Other.....

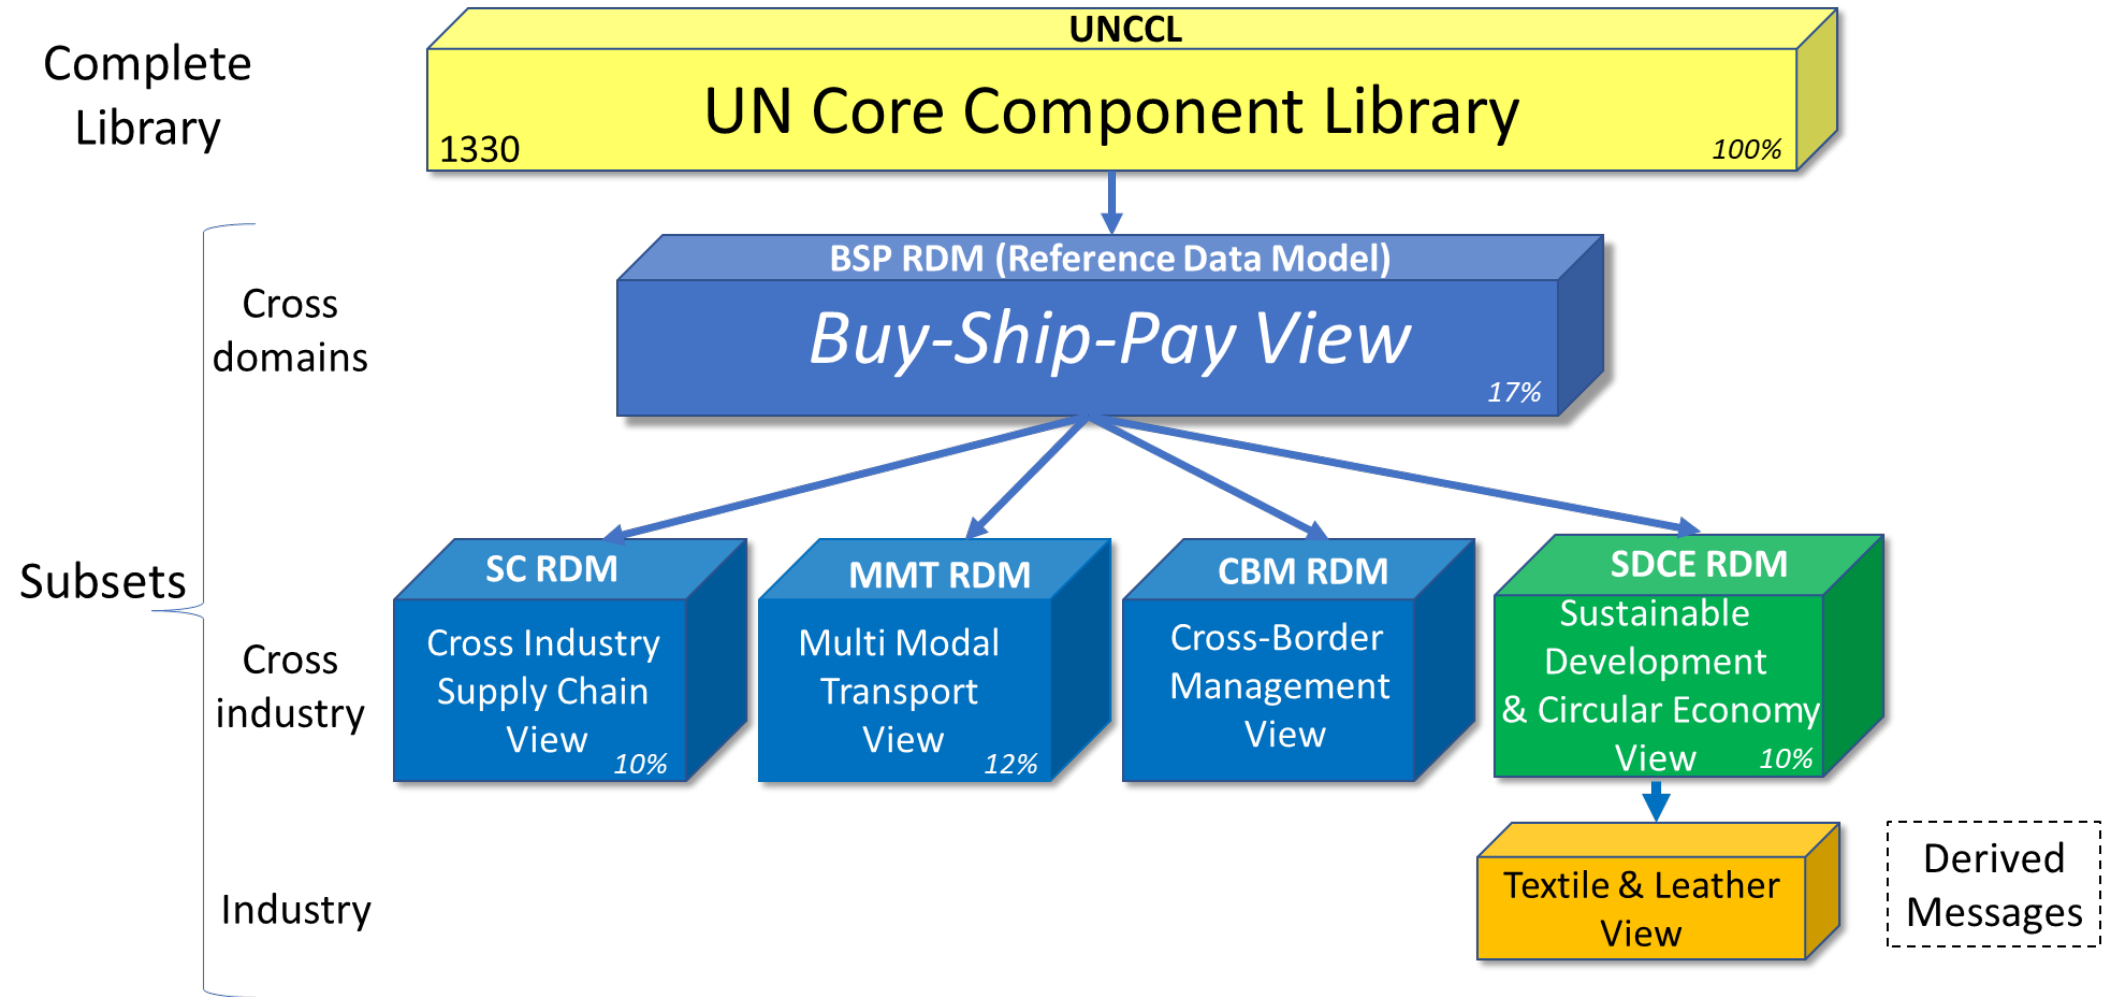

Agenda

Gerhard Heemskerk

- **Business Requirement Specification**
- **Data model and messages**
- **Code Lists and Identifiers**

Position of the textile and leather data model within the UN Library

Data components available within the textile and leather data model

Sustainability			Product		Agriculture

And more

Creating a new message means selecting the needed data components & elements for the new message

A common standard for information exchange

Claudia di Bernadino

Common = agreement on:

Processes

to provide the necessary information
for traceability and transparency

Data Structure

to be exchanged - message content,
code list and identifiers

Poll 3: Which is the main obstacle of introducing a common standard for garment and footwear sector?

- a) Insufficient perceived benefits
- b) Lacking interoperability between different solutions conflicts with the high dynamicity of them to businesses relationships
- c) Differences at the business level, including not only the content of data messages but also the organisation of business processes

Agenda

Gerhard Heemskerk

- **Business Requirement Specification**
- **Data model and messages**
- **Code Lists and Identifiers**

Code lists and identifiers

Codes and identifiers are essential components of any Machine-To-Machine information flow. They have been developed over time to facilitate the flow of standardized data.

- **Benefits of using codes and identifiers?**
 - Easy validation for correctness to ensure consistent semantics.
 - Improved communication with business partners.
 - Improved interoperability, processing of information by computer systems or software.
 - Improved comparability of information.
 - Avoiding duplicity of items.

ISO/IEC 15459
